TMBC WEE serving the
community since 1978

Who Are We?

Established in 1978, The Memorial Baptist Church Weekday Early Education program (TMBC WEE) offers a developmentally appropriate half-day preschool where children can learn and grow in God's love. Children flourish in an environment that provides learning centers with hands-on experiences, opportunities, and activities, that are coordinated to a child's level of development and readiness. We currently have close to 170 children, ages 15 months through pre-kindergarten, enrolled in 13 different classes with a staff of

Is There a Curriculum?

Our lesson plans are based on the *WEE Learn Curriculum* published by Lifeway. The classrooms are set up in learning centers to foster a "play-with-a-purpose" approach. After all, "play" is the natural way in which a child's curiosity helps him learn and explore. At the same time, classroom experiences stimulate creativity and self expression while developing skills for school-readiness. The curriculum also centers around themes that provide opportunities for children to learn about God's world and how to live in it.

What are Children Learning?

Preschoolers learn by "doing". Through this process they are developing and fine tuning skills that are providing a basic foundation for future years. In each of the learning centers, preschoolers have many opportunities to further their development:

Family Living/Dramatic Play Center

- Communication of ideas in words
- Develop understanding of roles
- Engage in problem solving
- Develop skills in conflict resolution

Books/Language Development

- develop visual and listening skills
- imaginative thoughts
- develop language and vocabulary

Sand and Sensory Center

- develop manipulative & sensory skills
- counting, matching, sorting, and discovery

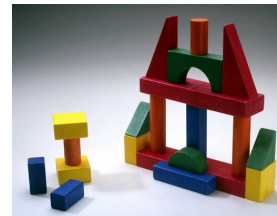

Science & Nature Center

- Learn to question,, sort, discover
- Observe, classify, and communicate

Block Center

- Develop muscular coordination through lifting, carrying, and stacking
- Develop sense of design and form
- Learn classification through spatial relations
- Scientific concept of balance, space, gravity

Manipulative Activity Center

- Choose activities that assist in learning about numbers, shapes, sizes, and colors
- Develop fine motor skills
- Practice eye-hand coordination
- Learn to associate, match, sequence, classify.

Art Center

- Self discovery of color, design, and form
- Make decisions and build self-confidence
- Learn shapes and colors

Writing Center

- Strengthen fine motor skills
- Exposure to literacy
- Comprehension of letters

Computer Center (ages 3 and up)

- Eye hand coordination
- Matching, sorting, classifying
- Critical thinking

Other Opportunities:

Music—once a week
"Big Church"—once a week
Playground—everyday
